

Products that make a poultry farmer smile.

Premium Series

The Poultry Hawk® Premium trolley serves poultry farmers like a steady hired hand. Powered by a 12-volt deep cycle battery and commanded by remote, which includes speed control, this robust machine works hard and will be around for a long time. Additionally, it's user-friendly features and it's versatility will soon win your heart to the point you won't want to 'walk the birds' without it. And, we might add, that the premium series includes a growing number of accessories that are designed to make your job easier.

E-series

Looking for a more economical trolley system? The Poultry Hawk[®] E-series is just what you need. The same size and with the same weight capacity as the premium series, the E-series is a rugged trolley that gets the job done. Though in many ways a basic machine, the E-series uses the same proven control board and key fob (with speed control) as the premium series. It also uniquely utilizes cordless drill batteries to power it, putting it into a class of its own.

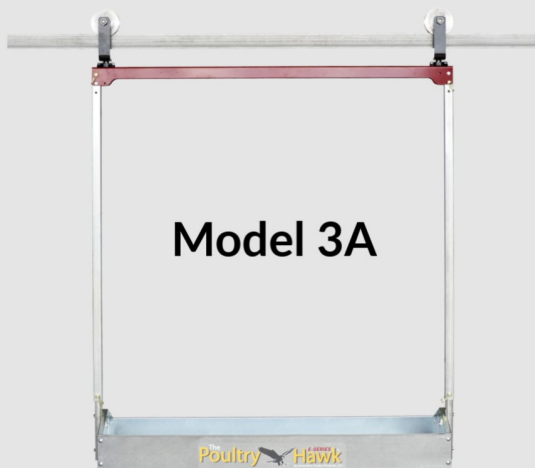

Model 1

- Automated trolley with manual dump •

Model 2

- Automated trolley with fixed basket •

Model 3A

- Manual trolley with fixed basket •

Model 3B

- Manual trolley with manual dump •

Rail System

Strong: span up to 10' spacing

Simple: quick and easy installation

Durable: galvanized rail and components

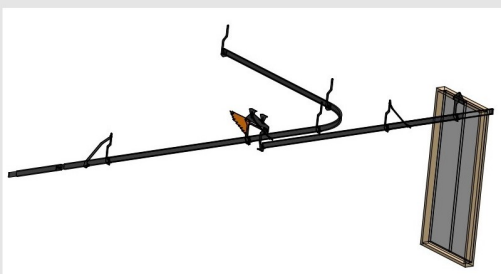

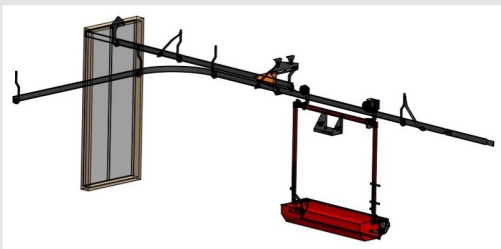

Innovative: modular system

- 1x3 metal tubing
- Premade corners-extend your single rail or create a loop
- Bridges-remove these to lower your divider curtain
- Hinges-allows the end rail to be raised out of the way of equipment without dismantling the track

Track Diverter

Want to handle your poultry mortality even less? Poultry Hawk[®] Track Diverter system allows you to get your dead birds out of the chicken building without handling them a second time. The innovative system includes a track diverter, a door, and an operating system. Extra rail, brackets and hardware needed for installation are also included in the package. Offered either as an automated electronic system utilizing 110-volt power or as a manual system, this system adapts to either an old or new Poultry Hawk[®] system.

Accessories

Sprayer

- Piggyback on the Poultry Hawk[®] or pull it in a wagon
- Powered by a 12-volt battery
- Portable
- 12-gallon capacity
- Changeable nozzles
- Up to a 40-foot swath
- Spray: Vaccines, disinfectants, and insecticides

Sprayer

Dock Charger

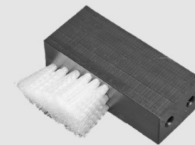

- Easy
- Time saving
- Poultry Hawk[®] charged and ready

Dock Charger

Brush

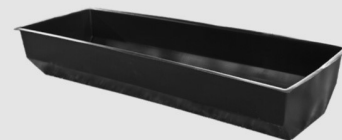

- Effectively cleans rail
- Improves quietness and smoothness of the Poultry Hawk[®]
- Easily installed beside the drive wheel

Brush

Feed Insert

- Bio-secure
- Lightweight
- Durable

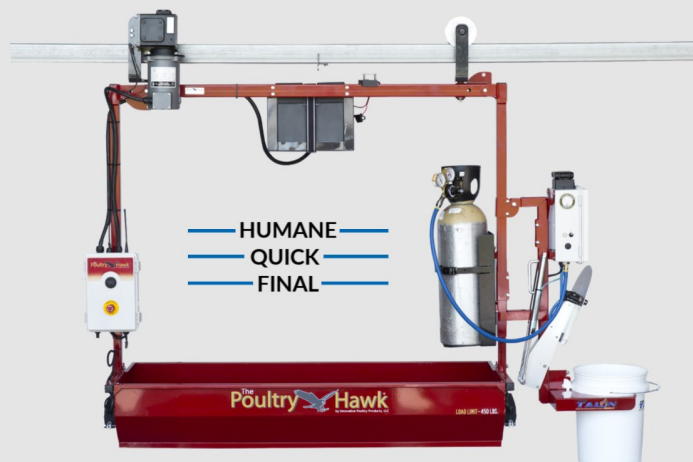

Feed Insert

THE TALON™

POULTRY EUTHANIZING SYSTEM

The Talon™ is a user-friendly and effective way to euthanize chickens using CO₂. Collect a few culls into the bucket, place the bucket in the bucket holder, press the button and let the Talon™ run its cycle. With the Talon™, you not only have an easy way to euthanize, but you can also enjoy the peace of mind that you are using an approved method of animal welfare.

TALON FEATURES

- Powered by a Dewalt 20-volt, Milwaukee M18, or Makita 18-volt battery (not included)
- Mount either on a Poultry Hawk® or on a wall
- Push button operation
- Transportable from house to house (a CO₂ kit is needed per house)
- Uses a Talon™ bucket
- Monitoring sensors ensure proper functioning
- Indicator lights show pertinent information

CO₂ SPECIFICATIONS

- Uses a common 20lb. CO₂ bottle (not included)
- Average number of cycles per bottle: 150-200
- Approximately \$0.15-0.20 per cycle

HOW IT WORKS

- Pressure sensors sense whether the system is ready for operation
- A flow meter senses that the proper amount of CO₂ is dispensed into the bucket per euthanizing cycle (90% target CO₂ displacement)
- The bucket lid remains closed for a preset amount of time after the CO₂ has been put into the bucket

We, Innovative Poultry Products LLC, care about the humane treatment of animals. This includes the treatment given to sick and lame animals; euthanizing them when necessary in the most humane way possible. Carbon Dioxide is a proven method of euthanizing that works quickly and painlessly. On this basis, the Talon™, a poultry euthanizing system, was designed.

The Talon™ brings animal husbandry to a new level offering a quick, humane, and final method of euthanizing. It also gives both integrators and farmers the peace of mind that they are in compliance with, even exceeding, animal welfare standards.

We are also a distributor for...

Poultry farmers are concerned about the pathogens that affect their livelihood. Path-Away effectively helps with the continual battle to keep the birds healthy. Path-Away is an organic, scientifically blended, plant-based product that is non-toxic and non-corrosive. Whether in a foot bath or applying it directly over the bird, include Path-Away in your regimen to fight the pathogens that hinder the performance of your farm.

Looking for an effective, efficient way to get rid of your dead stock and turn it into a useful product? The Omnivore Composter is the answer you are looking for. These solidly built, stainless steel clad, rotary composters are built for longevity and are efficiently powered through a 110-volt outlet. With several sizes available to meet your farms needs, "give it a whirl" with Omnivore Composters.

GIVE IT A WHIRL!

Innovative Poultry Products, LLC

About Us

Innovative Poultry Products, LLC exists to provide durable and useful tools that simplify the life of today's poultry farmers.

It was during the daily activity of "walking the birds" that the Poultry Hawk® took wing. Innovative Poultry Products, LLC was then established as the company to market the "Hawk."

Located in sunny South Carolina and driven by southern hospitality, IPP seeks to provide poultry farmers with prompt and dependable service. This includes employing knowledgeable and trustworthy individuals who will make your connection with us a pleasant experience. It also includes our growing dealer network. These professionals are willing and ready to help ensure that our products are serviced and supported promptly.
